Autoworx Barnyard Online

User Guide

1. Introduction

AutoWorx Barnyard is a comprehensive workshop management system designed to streamline the operations of automotive service centers. This software solution addresses key challenges faced by customers and mechanics and the workshop manager by providing an integrated platform for efficient service management. The system features two main components: a mobile app for customers to book, track, and manage their vehicle services, and for mechanics to complete tasks and update reports. And a web app for the manager to manage the daily operations such as bookings, tasks, and invoices

The primary purpose of AutoWorx Barnyard is to enhance the overall experience for both customers and workshop staff by automating and simplifying tasks such as job scheduling, invoicing, and customer interaction. With real-time updates, an intuitive interface, and seamless communication, the system aims to improve service efficiency, reduce errors, and foster customer satisfaction, making it easier for automotive workshops to manage day-to-day operations effectively.

2. System Requirements

- **Operating System:**
 1. Desktop (Windows, macOS, Linux)
 2. Mobile (Android)
- **Hardware Requirements:** Mobile Phone (Android), Laptop/Desktop PC minimum processor: Intel Core i3/Ryzen 3, RAM: 4GB, and storage space: 250 SSD
- **Software Requirements:** Web browsers and Docker

3. Getting Started (Mobile App Customer)

The user has to register on the mobile app before they could login to book a service for their car.

- **Logging In:** when the user opens the mobile app, they will land on the authentication page and they must provide their credentials

Customer:

1. Username: tm@email.com
2. Password: tm

- **Dashboard Overview:**

The dashboard has the following key components

3. navigation bar, notifications
4. Add Car
5. Default Car Details
6. Car Health
7. Service Recommendations

- **Use Cases Overview**

Authentication

Login and Registration

The Login and Registration feature in AutoWorx Barnyard allows users to securely create and manage their accounts for accessing the system. This feature is essential for both new users (who need to register) and returning users (who need to log in).

Registering a New Account:

1. Open the App: On the AutoWorx Barnyard home screen, tap the *Register* button.
2. Enter Personal Information: You'll be prompted to provide essential information, such as:
 - Full name
 - Email address
 - Password (make sure it's secure)
 - Phone number

- Address

Logging In:

1. **Open the App:** On the app home screen, tap the *Login* button.
2. **Enter Credentials:** Input your registered email and password.

Account Security: You can change your password, email, or phone number at any time within the account settings once logged in.

- **Service estimate**

The **Get Service Estimate** feature on the app allows users to quickly obtain an estimate for vehicle maintenance or repair costs through the mobile app. This process gives customers an idea of the potential expenses before booking a service appointment.

1. **Select Vehicle Details:** From the home screen, navigate to the *Service Estimate* section. Choose your vehicle from the list or add a new vehicle by entering its make, model, and other relevant information.
2. **Choose a Service:** Select the type of service or repair you need, such as an oil change, brake replacement, or general inspection.
3. **Submit Request:** Review the details and submit your request for an estimate.
4. **Receive Estimate:** The system will calculate the estimated costs, including labor fees, parts, and taxes. You will receive the estimate instantly, which you can review before proceeding with scheduling the service.
5. **Accept/Decline Quote:** The user can then choose to accept or decline the quote. If they Accept then they can continue to book an appointment.

A screenshot of a mobile application interface titled "Service Quote". At the top, there is a back arrow, the title "Service Quote", and an information icon. Below this is a "Service Summary" section with a wrench icon, the text "Air Conditioning Service", "Service air conditioning system", and a price of "R4611.02". A "Cost Breakdown" section follows, listing items and their costs: "AC Refrigerant" (R1808.05), "AC Compressor Oil" (R706.09), and "AC O-Rings" (R236.64). Below these are "Labour" (R450.00), "Tax" (R480.12), and a "Total" of "R4611.02". At the bottom are two buttons: "Accept" (green) and "Decline" (red).

Item	Cost
AC Refrigerant Refrigerant for AC system	R1808.05
AC Compressor Oil Lubricant for AC compressor	R706.09
AC O-Rings Seals for AC system connections	R236.64
Labour	R450.00
Tax	R480.12
Total	R4611.02

- **Appointment Booking**

Select Date and Time: Browse the available slots and choose a date and time that suits you.

Confirm Appointment: Review the appointment details, including the service type, vehicle, and time slot. Once confirmed, the appointment is saved, and you will receive a confirmation notification.

A screenshot of a mobile application interface titled "Book Appointment". It features a date picker showing a calendar for September 2024, with the 28th and 29th highlighted. Below the date picker is a "Select Time Slot" section with four buttons: "10:00 AM", "10:30 AM", "11:00 AM", and "11:30 AM". At the bottom is an "Appointment Summary" box showing "Date: Sunday, September 29, 2024" and "Time: Not Selected". A large green "Confirm Appointment" button is at the very bottom.

Select Time Slot

10:00 AM 10:30 AM 11:00 AM 11:30 AM

Appointment Summary
Date: Sunday, September 29, 2024
Time: Not Selected

Confirm Appointment

- **Appointment Management**

The user can manage their appointment history, as well as upcoming appointments.

1. View upcoming appointment
2. View Appointment History

- **Invoices**

The **Invoices** feature in AutoWorx Barnyard provides users with a comprehensive view of all their service-related invoices. This feature enables customers to track, review, and manage payments for services rendered.

1. **Access Invoices:** After logging into the app, navigate to the *Invoices* section from the main menu.
2. **View Invoice List:** A list of all your invoices will be displayed, showing details like invoice number, date of service, and total amount.
3. **Select an Invoice:** Tap on a specific invoice to view more detailed information, including:
 - Service description
 - Labor fees
 - Parts used and their costs
 - Applicable taxes and discounts
 - Total amount due

4. **Download or Print:** You can download the invoice in PDF format or print it directly from the app.
5. **Invoice History:** The app also keeps a record of your previous payments and any payment status updates.

This is how the downloaded invoice pdf should look like

Account Type:	Cheque

Car:
Car Make: Audi
Model: A6
Year: 2020
Registration No: DA41TFGP

 1/2

Service Labour:

Task No.	Task Description
1	Drain old engine oil
2	Replace oil filter
3	Add new engine oil

Parts Used:

Part Name	Quantity	Price
Engine Oil	1	R854.25
Oil Filter	1	R258.84

- **Service Tracking**

The **Service Tracking** feature enables customers and mechanics to monitor the status and progress of a vehicle's service in real time. This feature provides transparency and ensures that both parties stay informed throughout the repair or maintenance process.

For Customers:

1. **View Current Service:** You'll see a list of all your vehicles currently undergoing service. Select the relevant service to view its details.

2. **Track Service Stages:** The system provides a breakdown of the key stages in the service process, such as:
 - **Inspection:** Vehicle diagnosis and initial inspection.
 - **Service in Progress:** Actual repair or maintenance work being done.
 - **Pending Parts:** If parts are required and awaiting delivery.
 - **Completed:** When the service has been finished, and the vehicle is ready for pickup.
3. **Real-Time Updates:** Status updates will be automatically pushed to your device, allowing you to stay informed of any delays or changes.

For Mechanics:

1. **View Service Jobs:** Mechanics can access their service tasks through the web app. The *Service Tracking* feature allows them to manage ongoing service tasks for each vehicle.
2. **Update Service Status:** Mechanics can update the current status at each stage, ensuring that the customer receives timely and accurate updates.
3. **Add Notes or Additional Requirements:** If the service requires additional parts or extended time, the mechanic can log this information for both customer reference and internal tracking.
4. **Mark as Completed:** Once the service is finished, the mechanic can mark the task as completed, and the system will notify the customer.

- **Profile Management**

Manage profile and update user details on the profile section.

5. Troubleshooting & FAQ

1. How to Reset My Password if I forgot it.

1. Contact the workshop, the manager will reset the password and send it to you and you can login and reset it from the mobile app.

5. Getting Started (Web App - Manager)

The web application is designed for manager to manage workshop tasks and improve workflow efficiency. This guide walks you through the core features: User Management, Service Requests, Task Management, Invoices, and Car Parts Management.

This is the login page for the mechanic:

The default credentials are: jh@email.com / jh

The dashboard helps the mechanic with daily operations and provides valuable insight.

The Service Estimate chart shows the comparison and accuracy of the estimate and the actual invoice, and the Task Overview chart shows the percentage of pending tasks and tasks to be completed.

User Management

The manager can manage the mechanics as well as customers.

Services

This feature allows users to manage and monitor customer requests for services such as repairs or inspections.

1. View Service Requests:

- Navigate to Service Requests in the sidebar.
- You will see a list of all current service requests.

You can view service details for each service and the parts used.

Invoices

This section manages invoices for completed jobs, including parts used and labor costs.

The screenshot shows the 'Invoices' section of the software. On the left is a sidebar with navigation options: Customers, Services, Tasks, Cars, Invoices (selected), Reports, and Logout. The main area displays a table of invoices.

Customer Name	Car (Make/Model)	Service Type	Labor F...	Total (\$)	Actions
Joseph Radish	BMW 330i	Oil Change	300.00	\$300.00	[Edit] [Delete]
Tyasha Morris	Audi A8	Oil Change	320.00	\$320.00	[Edit] [Delete]
Marcelo Morris	Audi A8	Brake Service	700.00	\$700.00	[Edit] [Delete]
Tyasha Morris	VW Jetta	Air Conditioning Service	400.00	\$400.00	[Edit] [Delete]
Tyasha Morris	BMW 330i	Battery Replacement	300.00	\$300.00	[Edit] [Delete]
Tyasha Morris	BMW 330i	Battery Replacement	300.00	\$300.00	[Edit] [Delete]
Marcelo Morris	BMW 330i	Brake Service	700.00	\$700.00	[Edit] [Delete]

Steps:

1. Create an Invoice:

- After completing a service request, go to Invoices in the menu.
- Select the related service request from the list.
- Add line items:
 - Labor Cost
 - Parts Used
 - Tax/Discounts (if applicable)
- Review the total amount and click save Invoice.

The screenshot shows the 'Edit Invoice' form. It has a sidebar on the left with the same navigation options as the previous screenshot. The main area contains a form with the following fields: Customer Name (Joseph Radish), Car Make/Model (BMW 330i), Service Type (Oil Change), and Labor Fees. To the right of the form is a table showing the total amount and actions.

Total (\$)	Actions
\$300.00	[Edit] [Delete]
\$320.00	[Edit] [Delete]
\$700.00	[Edit] [Delete]
\$400.00	[Edit] [Delete]
\$300.00	[Edit] [Delete]
\$300.00	[Edit] [Delete]
\$700.00	[Edit] [Delete]

Update Car Part Prices:

A list of available parts will be displayed with details such as Part Name, Part Number, Quantity, and Price.

- Click Add New Part. And prices for a specific car

This guide ensures that you can effectively manage your workshop using AutoWorx Barnyard's web app. Explore the functionalities and optimize your workshop's operations!
